

Internet Assisted Review (IAR)

Internet Assisted Review (IAR) is moving into a Pilot phase in December 2002. During the pilot, several NIH SRAs and GTAs will be using IAR for a few of their Review meetings. Reviewers assigned to these meetings will be invited by their SRA to create NIH eRA Commons accounts and use IAR.

IAR will be released to additional SRAs, GTAs and their Reviewers during the beginning of 2003 with more users expected after the March 2003 deployment.
