NOTE: A **Final Score Sheet** link will be added to the **Actions** on the *List of Meeting* screen in a future release.

Project Title Field Expanded

With this release, eRA Systems and databases are able to accept grant application titles up to 200 characters. The project titles will no longer be truncated to the previous limit of 81 characters. eRA is in the process of modifying all systems for this new allowance, however, not all screens and reports have been modified in this initial implementation.

Fixes

Check Conflicts Screen Will Exclude Applications Not Released from Receipt & Referral

Previously, applications not yet released from Receipt & Referral (R&R) were appearing on the IAR *Check Conflicts* screen used in the optional Recruitment Phase. IAR should not display applications still being processed in R&R (status code 70). In cases when these applications were updated by Reviewers, the R&R system could not process and release the applications correctly.

Resolution

This issue has been resolved. The *Check Conflicts* screen in IAR will only show applications that have been released from R&R.
