xTrain Module Version 3.7.2.1 Release Notes

Fixes

Electronic Signature of PI Corrected on Termination Notice

Previously, the electronic signature of the PI was missing from the Termination Notice (TN) on R25, KL2, K12, R90, RL5, and RL9 grants.

Resolution

This issue has been resolved. The Termination Notice has been fixed to display the electronic signature of the PI.

Appointment PDF Corrected for Prior Support

Previously, the appointment PDF incorrectly displayed the original appointment information for prior support instead of the early termination date (as the appointment end date) and the new stipend amount.

Resolution

The appointment PDF has been fixed for prior support.
