# NIH eRA Commons Release Notes Version 2.7.3.11

## Edit Institution Screen

A modification was implemented, which makes the Org Type, Org Type Other, and Ownership Control fields *Read-Only*.

### Institutional Usage Screen (IPF2003)

The Alt text for the sorting icons has been modified.

For the **Name** Column:

- Up Arrow – “Sort Name by Ascending Order”
- Down Arrow – “Sort Name by Descending Order”

For the **User Name** Column:

- Up Arrow – “Sort User Name by Ascending Order”
- Down Arrow – “Sort User Name by Descending Order”

### Institution Registration

The following modifications have been implemented:

1. An intermediate Instruction Page was added to the IPF Registration Form informing users about printing/sending the next page to the NIH. This Content Managed Instruction Page has been included immediately after submitting the Registration form and before being directed to the Printable version of the form.
  - Users should, select **Continue** to access the Printable Form for printing and faxing to the NIH.
2. A modification has been made that makes the DUNs field a required field for the Register Institution.

## Status

An enhancement has been made that adds new functionality to the Status Hit List for *PI only*. The Prior failed eSubmission records have been excluded by default from the Hit List.

---

**NOTE:** This functionality will be added for the SO in a later release.

---

A toggle switch has been implemented:

- The **Show Current eSubmissions Only** button is the *default*, which does not show the list of prior eSubmissions that have failed.
- Click the **Show all eSubmissions** and display all failed prior eSubmissions.

## **Status Hit List/Status Details**

A correction has been made to the Application ID on the Status Hit List and Status Detail Screens. Now the Application ID shows the Tracking number as issued by Grants.gov when the grant is submitted through Grants.gov electronically.

## **FSR**

An enhancement has been added, which filters out Non-NIH grants from All Searches for FSR.
