

Grant Folder Enhancements

End of 2004/Beginning of 2005

- Add CGAP Appendix document to all existing Grant Folders.
- CGAP-RR Receipt First Contact Details screen added:
 1. PI History – Detailed Report
 2. e-Application
 3. Appendix Materials
 4. CGAP Application Cover Letter
- For CGAP RR Breakout Details Screen added:
 1. PI History – Detailed Report
 2. CGAP Application Cover Letter
 3. CGAP Face page
 4. CGAP Budget Page
 5. CGAP Checklist Page
- Fixed the Prior Summary Statements Links to account in changes to grant number. Now a more accurate trail of Prior Summary Statements is displayed.
- Changed label "Prior Summary Statements to Other Summary Statements on the Grant Folder screen.
- Added closeout documents (from Commons):
 1. Final Invention Report
 2. Final Progress Report

Planned For June 2005

- Reconcile all Business Areas (C/S and J2EE systems) to point to a Shared uniformly deployed Grant Folder system. This will remove a dependency to redeploy the Business Areas every time there are changes to Grant Folder.
- Project Folder – ability to see all project years of the Grant Family within the Grant Folder.
- Create Electronic Cover Sheet for CGAP Submitted Applications and at the time of display of the Grant Image for these applications, merge the Electronic Cover Sheet together with Grant Image.
- Add Appl ID and Application Status as fields on the header of the Grant Folder screen.
- Commons PI View – Add a link "Commons PI View" to the Grant Folder. When clicked, the link will bring up the Commons PI Details screen. This feature will allow internal staff to view the information as PI sees it through eRA Commons.
- Add ability to view CGAP Appendices 2 through 10 (right now there is only one Appendix) as submitted via CGAP.

Planned For August 2005

- Event Log – The event log will allow Grant Folder to display application Events as audited by the eNotificaiton. Additionally, any emails that go out as part of that Event will be available via the Event log on the Grant Folder screen. This feature will allow future additions of documents to Grant Folder without code changes to the Grant Folder software.

- Content Management – The Grant Folder Screen will be content managed for ease of administration.
- Help File – currently there is no help file within the Grant Folder, because historically it was very intuitive to use (just links to documents). With addition to the Commons PI View and Event Log, the Help File is needed to explain various features of the Grant Folder. The Help File will be Content Managed centrally to allow for easy modifications of the Help Content.
