

# **xTrain in eRA Commons**

CWG Presentation – 01/07/2007

## Overview of Presentation

- Scope of the First Release of xTrain
- Process for Trainee Appointment
- Process for Appointment Termination
- User Interface Maps
- User Interface Walk-through

## Scope of the First Release of xTrain

- Trainee Appointment Process - Ability for PD (Program Director) to designate the New Trainee Appointment. This functionality will include an ability for the PD to identify a person in eRA Database (or request to create a new person), fill out the 2271 Form, route the Form to Trainee for completion/corrections, route the form to NIH staff for Acknowledgement/Approval.
- Trainee Termination process – Ability for PD to initiate the Termination process and Route to Trainee for Completion. Ability to Route the Termination request to Business Official (BO) of the Institution. Ability for the BO to Route to NIH Staff. Ability for NIH to approve/reject termination.
- Add a new role “Business Official” that can be granted by SO to people within the Institution. Note that in order for SO to act as Business Official as well, SO will grant the role to him/herself just like to any other person.

## Scope of the First Release of xTrain (Cont.)

- Registration for new eRA Commons Accounts – to support Appointment and Termination processes, system must provide Registration for new eRA Commons account capabilities to Trainees. This process will support both New Appointees, as well as existing appointees without eRA Commons user accounts who are being Terminated and do need accounts to complete the Termination process.
- Support Fellowship Termination process – which is the same as for Training Appointments with the exception of cases where Fellowship end-date has changed. If that's the case, the Notice of Grant Award needs to be regenerated prior to the termination notice being approved.
- Support T15 NLM Appointment and Termination process. The process for NLM is exactly the same as for Training Grants, except that there is never a Payback. However, because there are differences in stipend levels with NLM and NRSA Training Appointments, the system will automatically use the appropriate stipend levels for NRSA and NLM, to avoid confusion.

## Scope of the First Release of xTrain (Cont.)

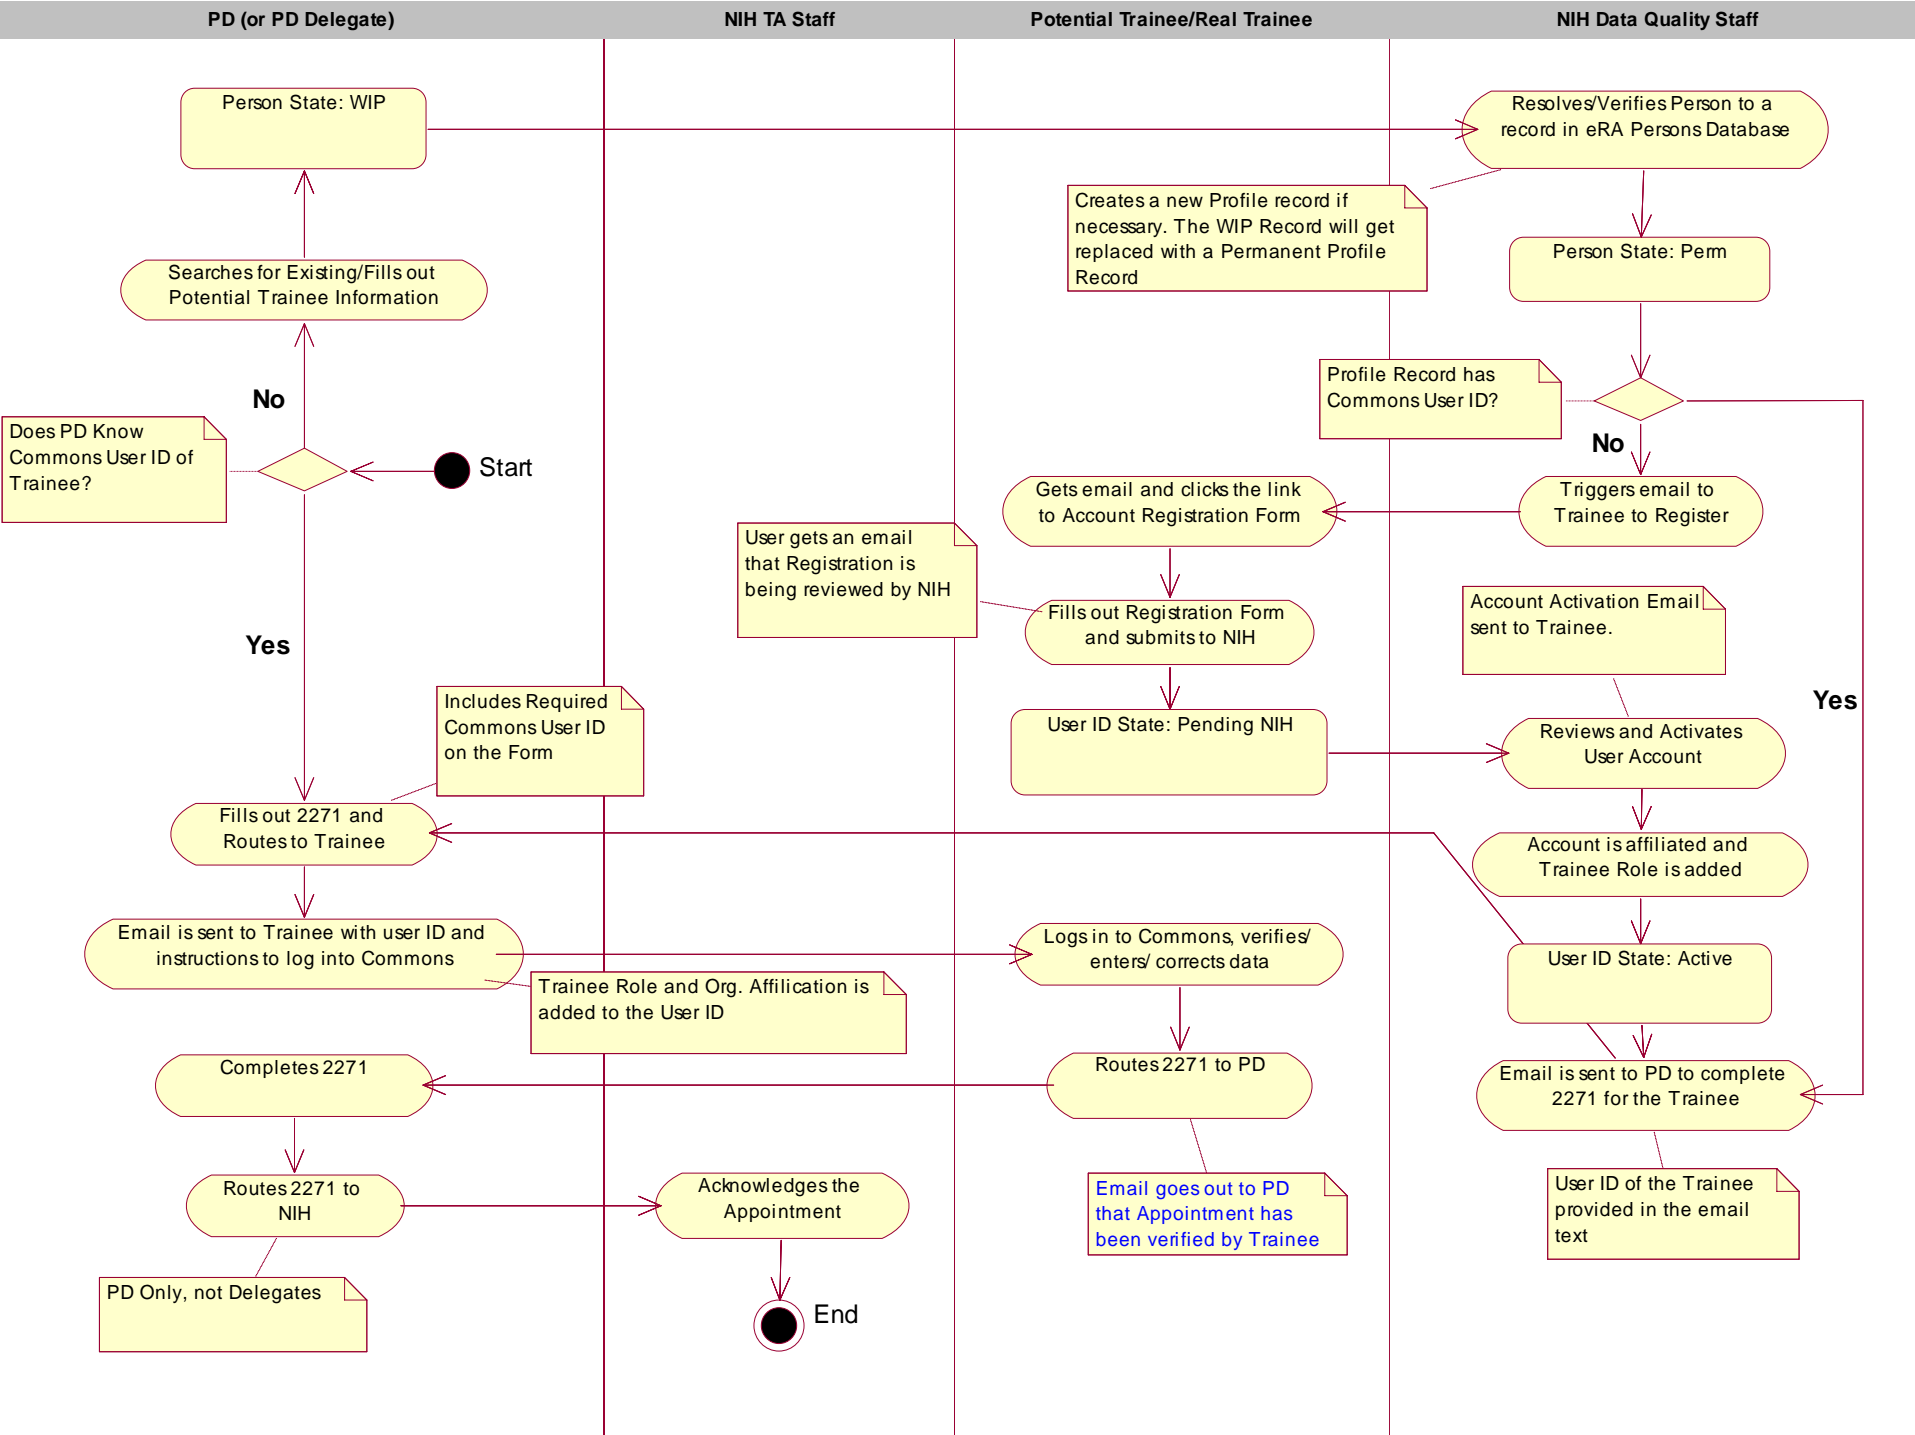

- Ability for Business Official to access, review, route the Termination Notices to NIH.
- Ability for SO to have Read-only access to Appointment/Termination information for any training grant within the Institution.
- Ability of the users with ASST role to be able to initiate Appointment/Termination forms on behalf of PDs. The ASST can potentially be assisting more than one PD, thus the list of Projects for the ASST (upon initial navigation to xTrain) will show projects of all PDs who granted ASST user xTrain authority in Commons.
- Ability to grant "xTrain" authority by PD to other users within Commons (similar to Submit eSnap).

## Scope of the First Release of xTrain (Cont.)

Appointment, Payback, and Termination Forms for Post-Doc trainees require a signature to be on file with NIH, in order to confirm both the appointment and the agreement to fulfill their payback obligations either through qualifying service or financial payback. An alternative to the actual signature is Digital Signature. However, it is not clear at this time how exactly will the Digital Signature be implemented at eRA, what level of security we must require, and how expensive will this be to the end-user community. Thus, newly developed system must support the proposed electronic process for forms that do not require hard signature, as well as the alternative flow for those users, who require signing and mailing the actual forms to NIH.

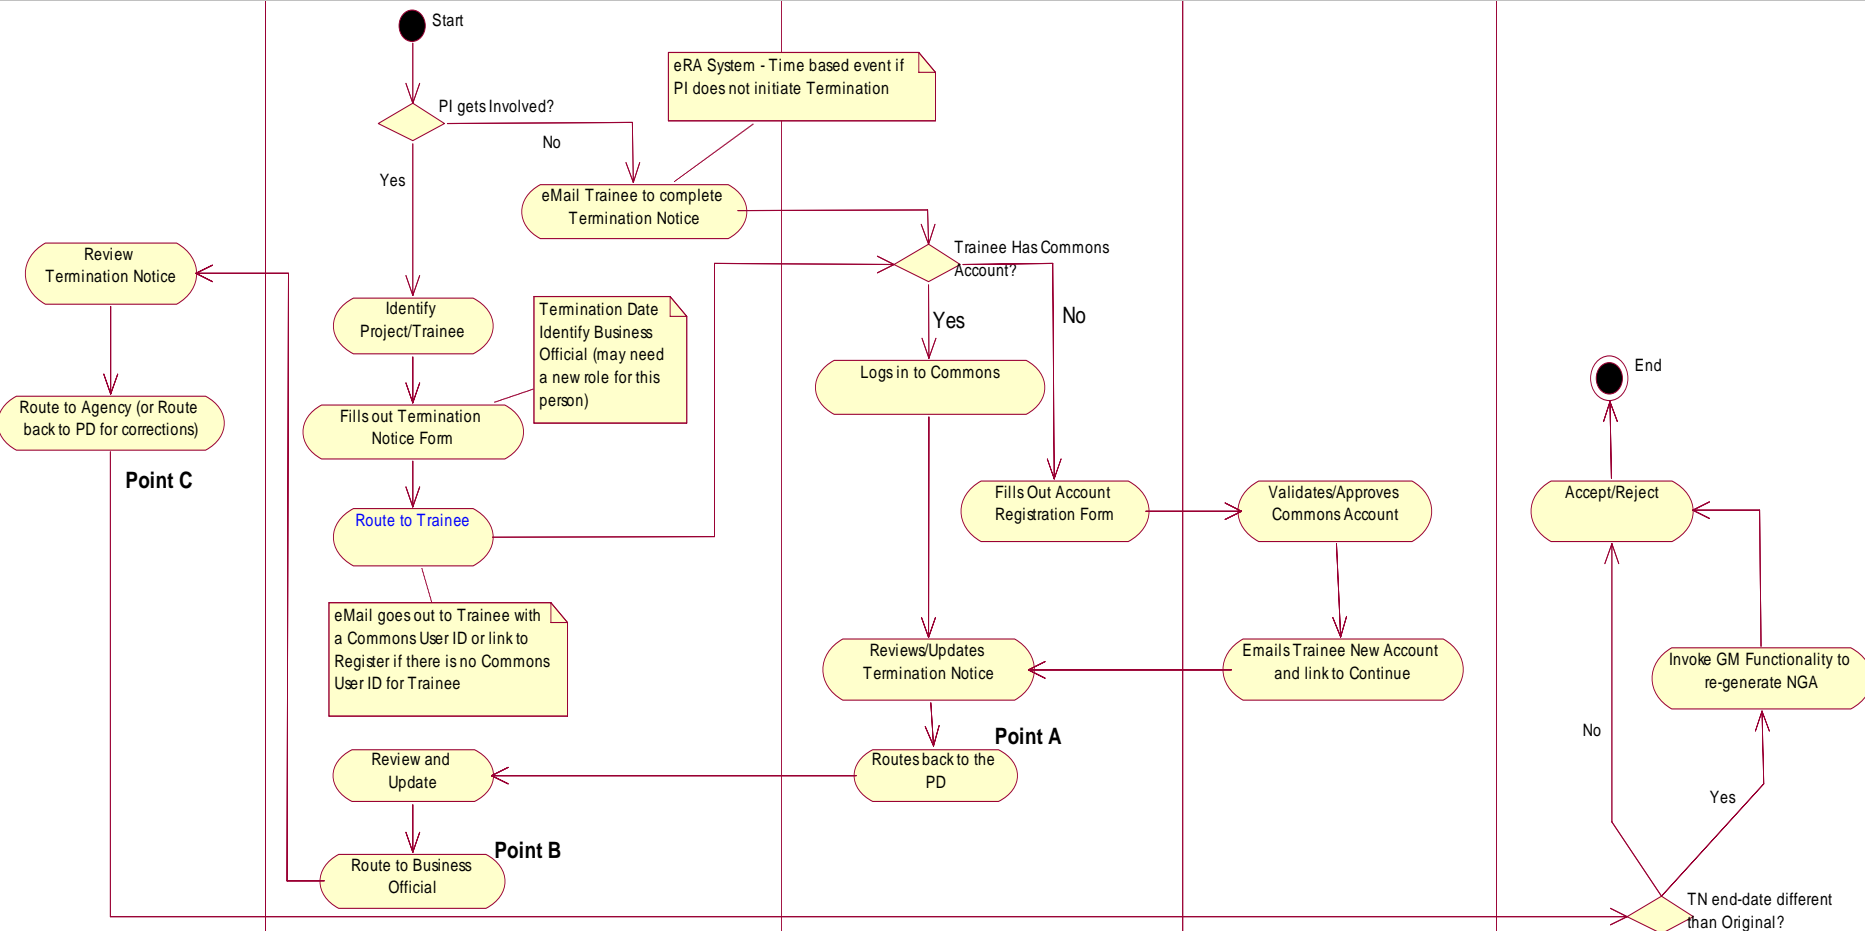

This will work by allowing the user who must submit signed forms to NH to follow the complete electronic process, and then have an instruction at the end of the process (when user clicks the Route to NIH button) to print and mail forms to NIH. For all post-doctoral trainees beginning their first 12 months of post-doctoral support, the system will need to print both the completed appointment form and the payback agreement for signature and subsequent mailing to the NIH.

# Process for Trainee Appointment

# Process for Appointment Termination

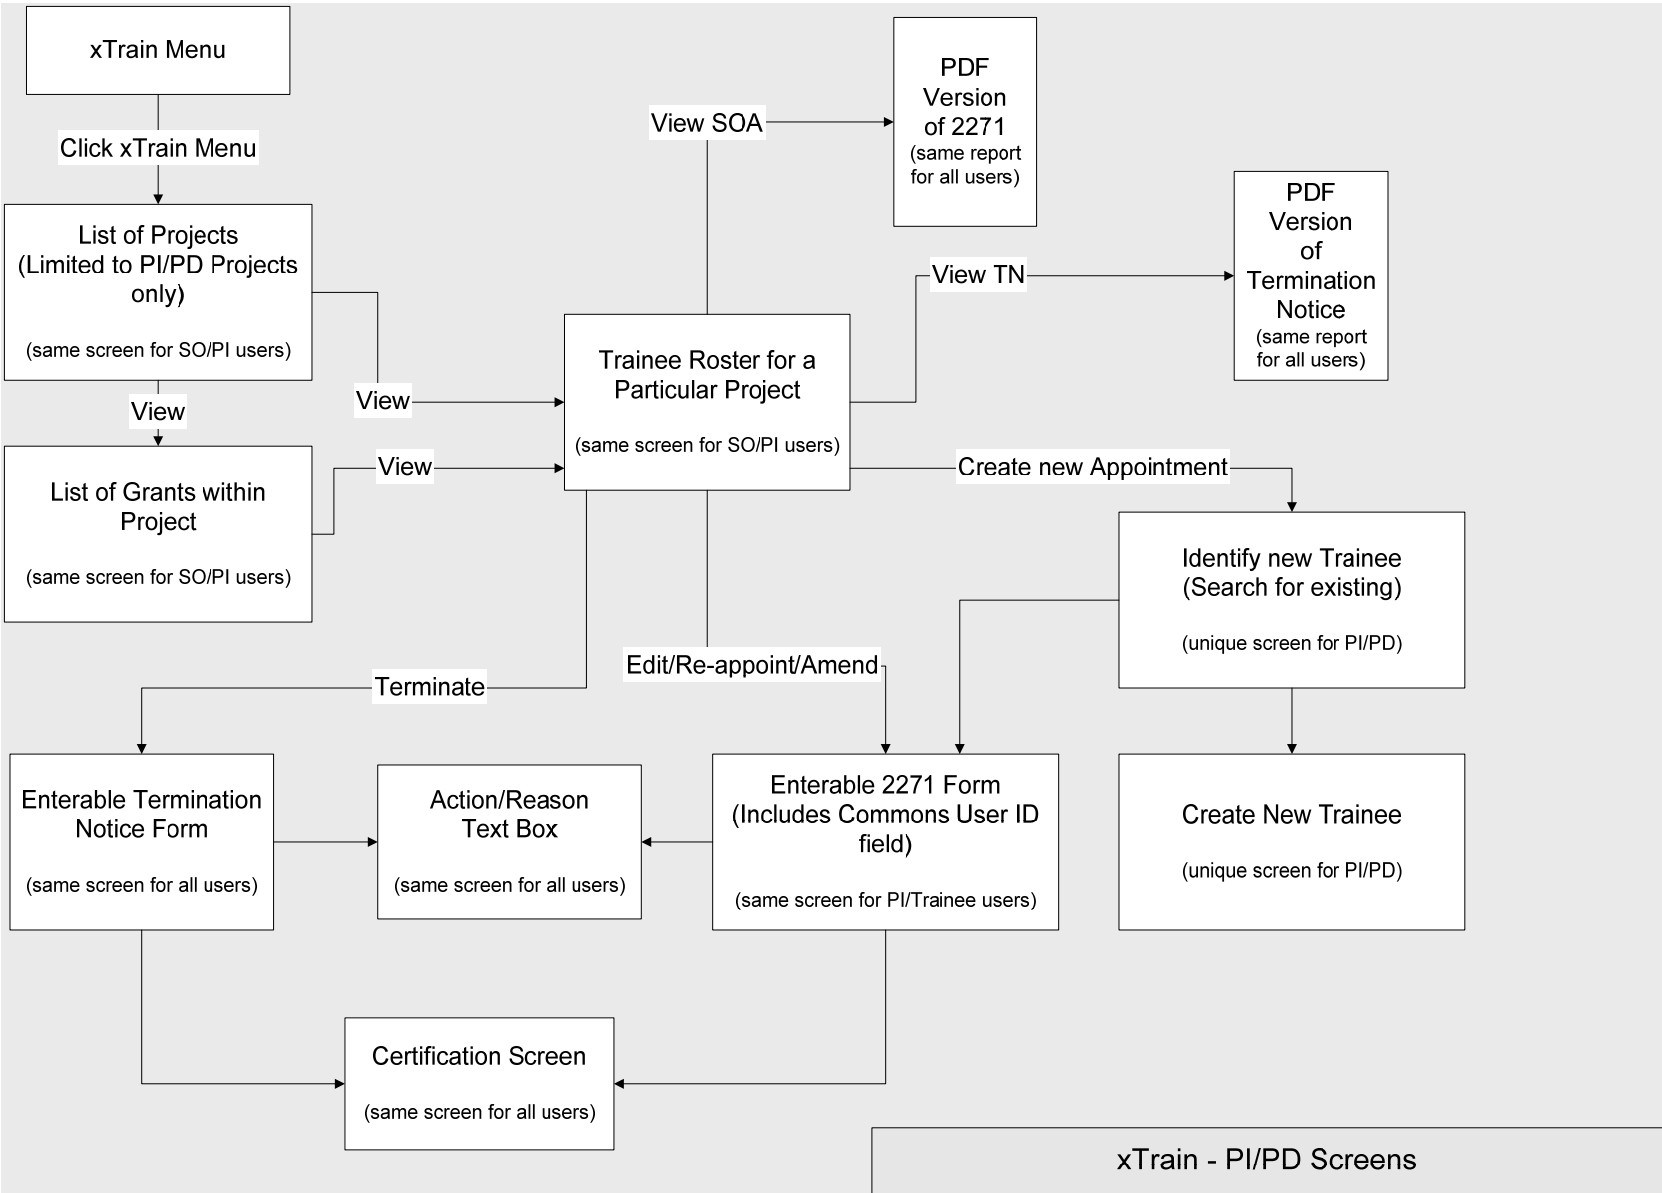

## Bypasses:

Point A: If Trainee Does not respond within allowable time period, the system forwards Termination Notice back to PI/PD

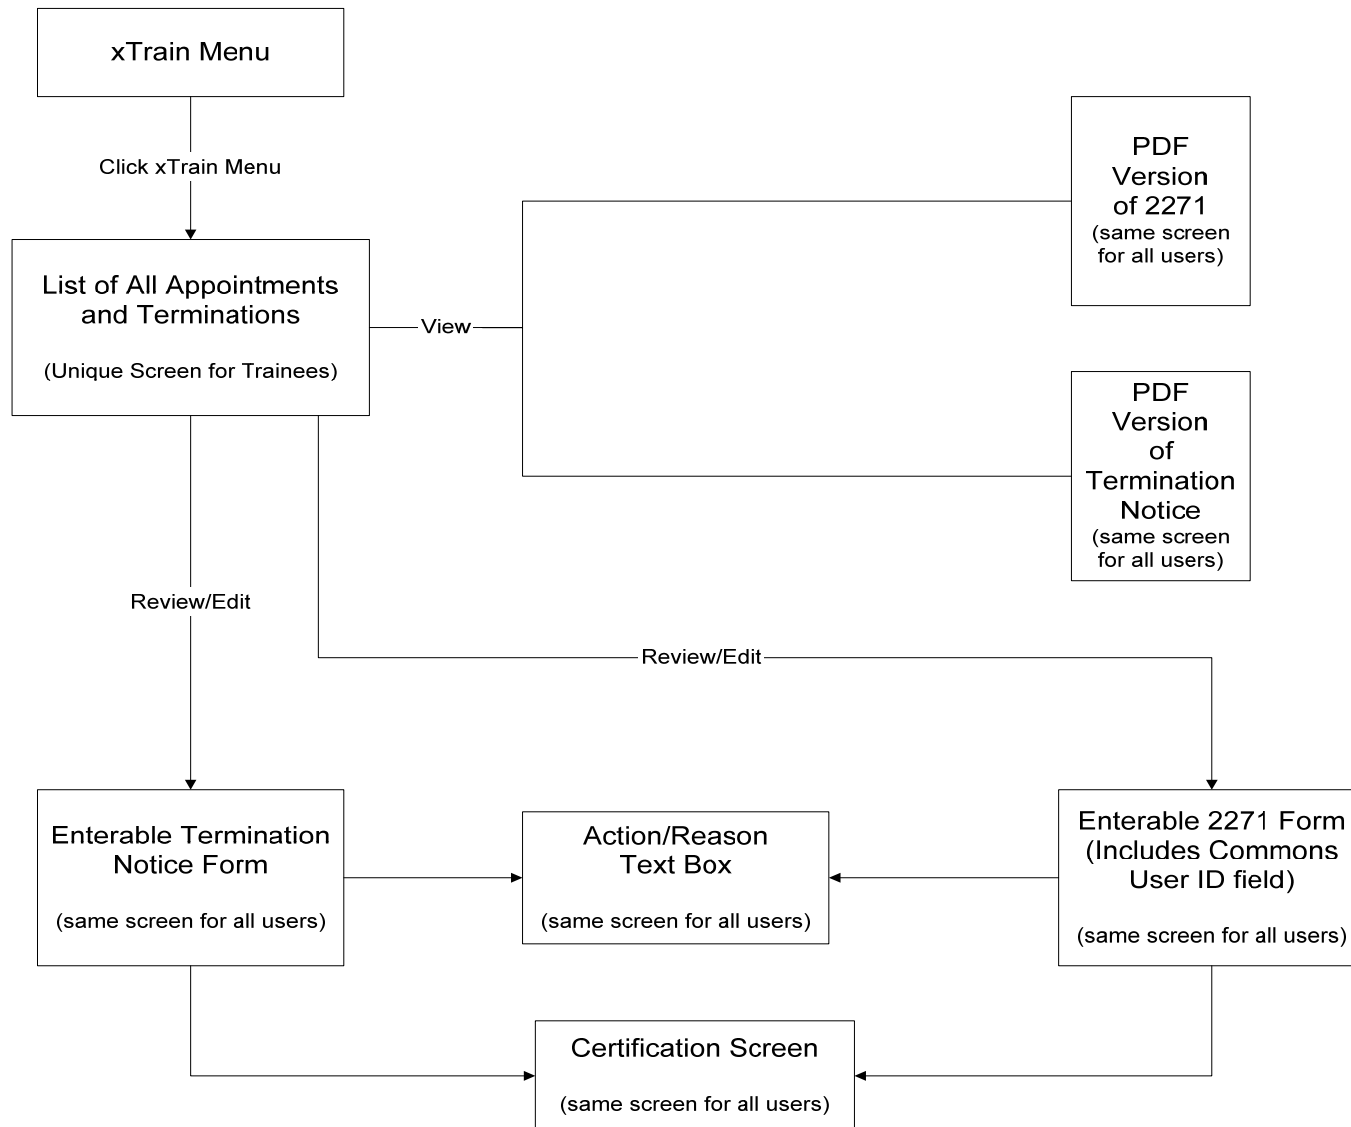

Point B: If PI/PD does not respond within allowable time period, the system forward Termination Notice to BO/SO

Point C: Termination Notice is not forwarded to NIH automatically

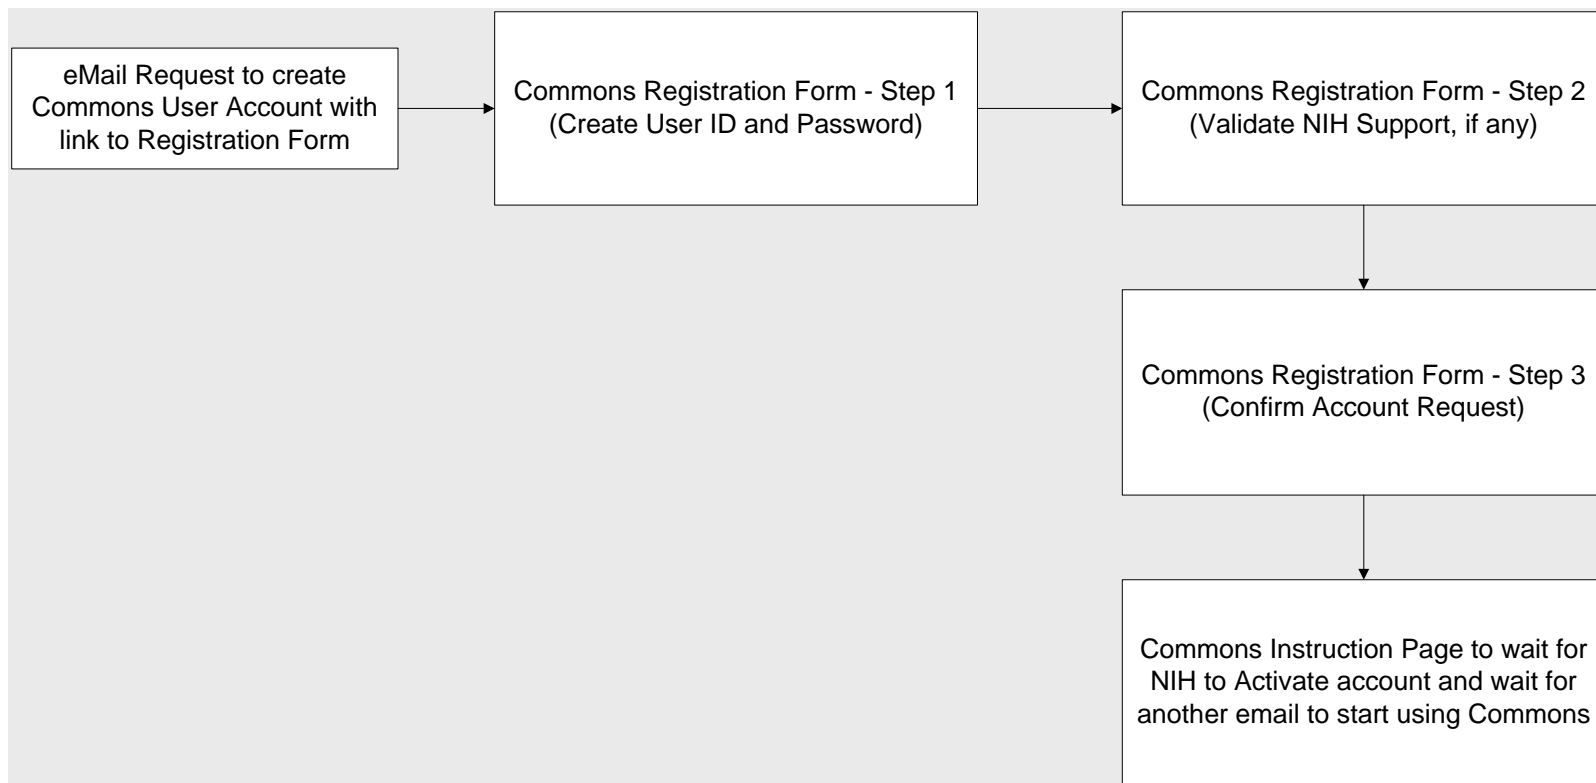

# User Interface Map – For PD

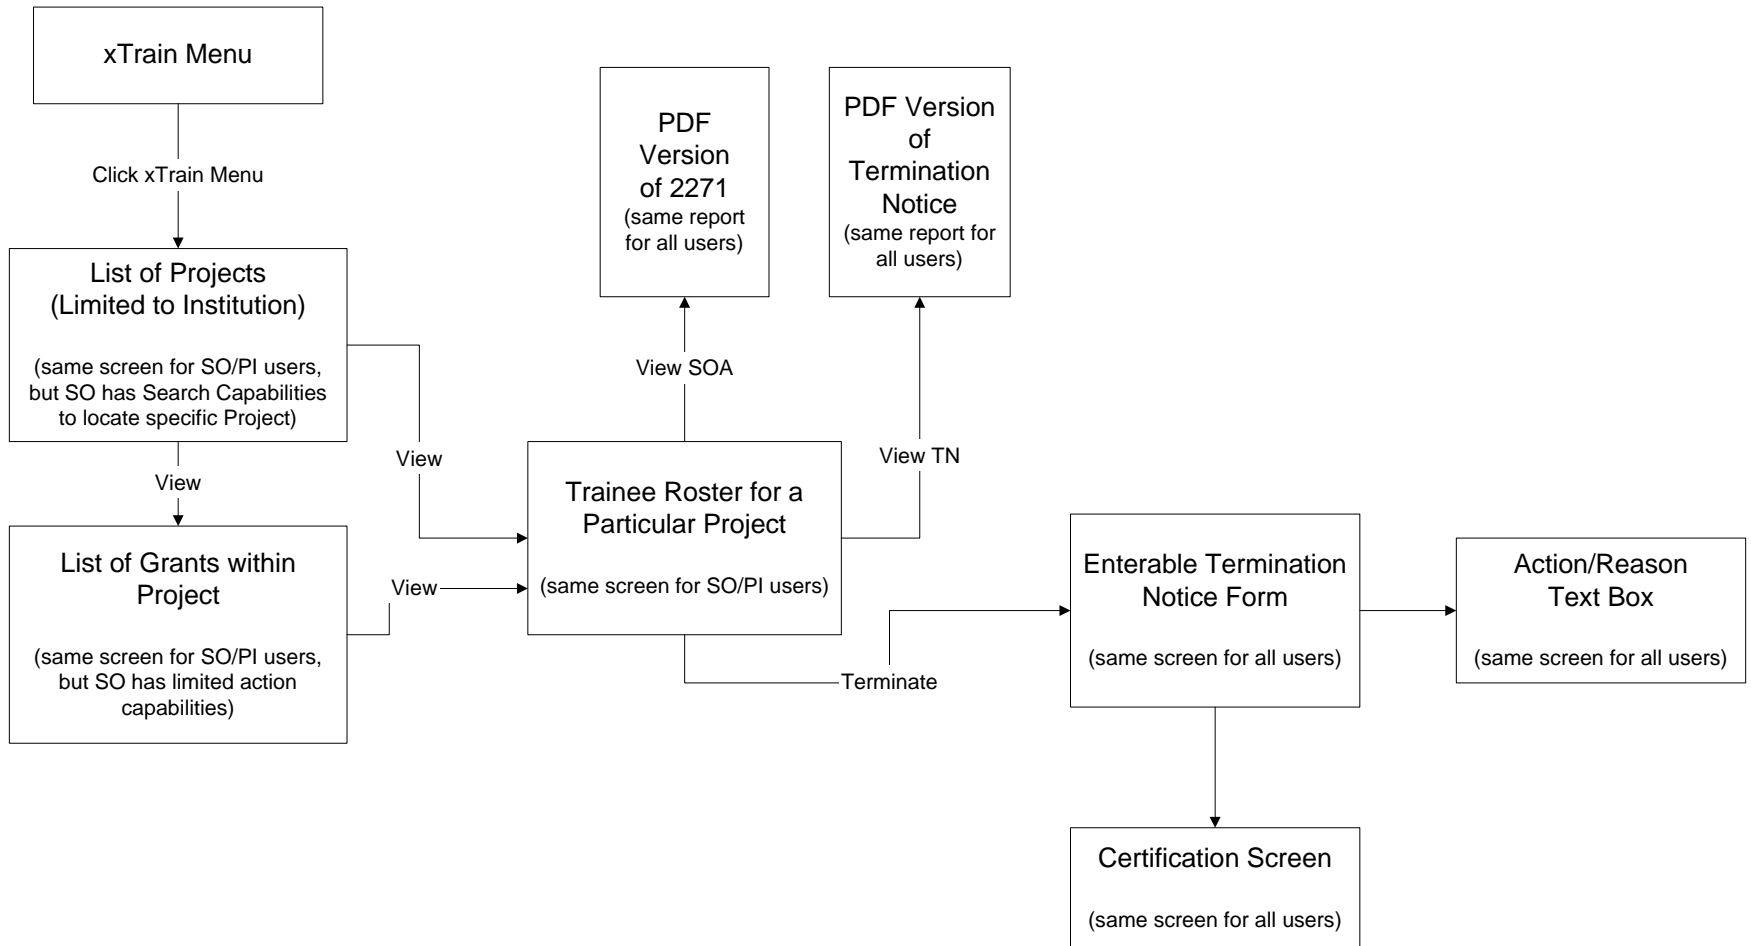

# User Interface Map – Trainee with Commons User ID

# User Interface Map – Trainee without User ID

# User Interface Map – For SO/BO

## Identify Trainee ?

Enter search parameters to locate existing Trainee Profile. Search will be performed against all profile records with Training or Fellowship involvement with NIH. If you cannot locate the existing Profile record, upon the execution of the search the button to create a New Trainee Profile will be provided.

If you located a Profile that does not have a Commons User ID, then please request the Profile person to create a Commons User ID by inviting Profile owner to Register. Once registration is completed, you will get email with a User ID of that profile so you can proceed with appointing that Trainee.

Last Name	First Name	Commons User ID

## Create New Trainee Profile ?

Upon clicking the Submit button, the email with invitation to register for Commons User ID is going to be sent to the Trainee.

Once Trainee completes the Registration process to create Commons User ID and NIH activates the Trainee account, you will be emailed the Commons User ID of the trainee so you can initiate the Trainee appointment.
