
Extramural Trainee Reporting and Career Tracking (xTRACT) Version 1.3.6.3 Release Notes

Fixes

Users with more than 10 Overlapping Faculty now have the Ability to Access all Overlapping Faculty

Previously when editing the **Overlapping Faculty** list under *Institutional Training Support Detail* section for a *Research Training Dataset (RTD)*, and the number of overlapping faculties exceeded 10, users were only able to view the first 10 faculties in the list. The system was displaying a Bad Request (400) error, whenever a user attempted to navigate to the next page of results.

This issue has been resolved.
