Latest Updates

April 30, 2020

xTRACT is updated to correspond to the new Forms F version, which is releasing in May 2020. Other changes unrelated to Forms F were also made to xTRACT.

Forms F changes changes include:

- *Diverse Backgrounds* field labels are now *Underrepresented Groups* in several screens.
- *New Entrants Appointed to this Grant* field labels are now *New Appointees to this Grant* in several screens.
- In the Applicants and Entrants section, the field label for *Percent from Underrepresented Racial & Ethnic Groups* is now simply *Percent from Underrepresented Groups*.
- In the Applicants and Entrants section, the Counts section no longer records percent with disability.
- In the Participating Trainees section, under Publications, there is no longer a checkbox to mark publications as Abstract-Only, as abstract-only publications should no longer be listed.
- In the Participating Trainees section, trainees can now specify a leave of absence in the Support During Training section by adding a Leave of Absence entry under Other Sources of Support. Refer to the section of this document titled *Support During Training* on Page 129

Other changes include:

- In the Participating Faculty section, for NIH and Other Agency Sources of Support, grants that are on record in federal grant systems are now auto-populated as sources of support. Refer to the section of this document titled *Research Support* on Page 111
- In the Participating Trainees area, when adding Post-Training Positions, you can now specify any position title instead of choosing from a list of possible positions. You also report slightly different information on the position, such as Workforce Sector, Principal Activity. Refer to the section of this document titled *Post-Training Positions* on Page 132
- Three new topics explain what areas of xTRACT populate specific tables in the generated PDF training tables. See *Training Table 6*, *Training Table 7*, and *Training Table 8*.
- In Participating Faculty, for NIH and Other Agency Sources of Support, you can now search for other grants to add as sources of support, in addition to those that are auto-populated based on recorded sources of support in federal grant systems. Refer to the section of this document titled *Research Support* on Page 111.
xTRACT User Guide

- In Participating Faculty, under Faculty Member Data, you can now specify a non-academic title for a position, instead of academic titles such as Professor and Instructor, by selecting Other when editing faculty member data. See Faculty Member Data.

Upload Feature for Participating Trainee Data

Users will now be able to upload participating trainee information in batches, by providing a file separated by tabs that contain certain information for each trainee. For each row of information in the file, a participating trainee will be either inserted or updated as appropriate.
NOTE: You may choose to create your file using a spreadsheet application, and then save the file as a “tab-delimited” text

April 27, 2017 - Features and Updates

Feature

- Longer Research Topics are now supported:
  When entering the in-training data for a participating student or trainee, the allowable length of the Research Topic has been increased, from 80 to 200 characters.

Updates

- Corrected styling of author names, for citations selected from PubMed.
  For any publication that is being selected from PubMed and added for a student/trainee, each author name for the citation should now appear in NLM style.

- Corrected Year Awarded, Shown in Table 8 for Non-NIH Subsequent Grants.
  Occasionally the year awarded would be shown incorrectly for a Non-NIH subsequent grant in table 8. This problem has been corrected.

- RTD Training Table aids added.
  Information explaining how the data is populated into the training tables for RPPRs has been added for Tables 1 & 2. The information for the remaining tables will be added in subsequent updates as an ongoing project.

February 16, 2017 - Faculty Bulk Upload

The xTRACT system has been updated to allow the bulk upload of faculty instead of the previous requirement to add one at a time. This applies to New, Renewal, and Revision RTD’s. When the Upload Participating Faculty button is clicked, an instruction page will open allowing the user to browse to and select the current file or, if the file does not exist or is in the wrong format, there are links in the instructions for downloading a template and to convert an Excel file to the proper tab-delimited format required.

December 8, 2016 release of xTRACT.

- Ability to copy data from a recently-prepared RPPR RTD into a Renewal RTD. When working with a Renewal RTD, xTRACT users will now be able to copy Participating Trainee and Program Statistics data from a recently prepared RPPR RTD for that same training grant, provided a recent RPPR RTD exists. If an RPPR RTD for the grant’s final non-competing period has already been started, then the data will be copied from that. Otherwise, if an RPPR RTD for the grant’s previous non-competing period is available, the data will be copied from that RTD instead.
• The option to copy data from the recent RPPR RTD will be offered when the Renewal RTD is first initiated. Users will also have the option to copy each type of data (Participating Trainee or Program Statistics) when editing the RTD, whenever visiting each of the corresponding data entry sections.

• Ability to copy data from a recently-prepared Renewal or RPPR RTD into an RPPR RTD. When working with an RPPR RTD, xTRACT users will now be able to copy Participating Trainee and Program Statistics data from a recently prepared RTD for that same training grant, provided a recent RTD for that grant exists. A copy can be performed from the previous year’s RPPR RTD for that grant (if available). Also, when preparing the RPPR RTD for the final non-competing year, there will be an additional option to copy from the next Renewal RTD for that grant (provided the Renewal RTD has been started).

• The option to copy data from a recent RTD will be offered when the RPPR RTD is first initiated. Users will also have the option to copy each type of data (Participating Trainee or Program Statistics) when editing the RTD, whenever visiting each of the corresponding data entry sections.

• Adjustment to the auto-population of Faculty Research Support, from NIH and Other Agency Sources. Faculty Research Support from NIH and Other Agency grants are automatically populated in xTRACT, based on award data that we have on hand (and cannot be edited). However, there have been some occasions when an NIH/Other Agency grant has not been listed – even though it seems like it should have appeared. Often when this occurred, it was because of a short delay in funding the most recent noncompeting year for the research grant in question, making it appear that the grant was not active at the time that the RTD was being prepared. An adjustment has been made to account for this sort of timing, so that any such awards are correctly included in the listing of NIH/Other Agency Research Support for that faculty member.

• Improved Performance of Preview/Finalize RTD. The amount of time required to preview or finalize an RTD has been improved. When choosing either one of these options, results should be returned more quickly than before.

• Fixed issue in Applicants and Entrants Section. Some users had noted cases where multiple occurrences of the same “Prior Institution” would appear on rare occasions, after entering these in the Applicants and Entrants section. This problem has been resolved.

**April 28, 2016 release of xTRACT.**

• **User Interface (UI) improvements:** xTRACT is getting updated to the contemporary web style seen in other parts of eRA Commons (see March’s eRA Items of Interest). For example, xTRACT will use type-ahead drop-down lists (also referred to as “predictive
search”) in certain places. This means as the user begins to type in the field, the system immediately displays matching results, and thus reducing the time it takes to find the desired result.

What is xTRACT?

Extramural Trainee Reporting and Career Tracking (xTRACT) is a module within eRA Commons used by applicants, grantees, and assistants to create research training tables for inclusion in progress reports and institutional training grant applications.

Because xTRACT is integrated with Commons, it is able to use xTrain appointment and related data to pre-populate some training data for training tables and reports. This includes data related to trainee names, selected characteristics, institutions, grant numbers, and subsequent NIH and other HHS awards. xTRACT also allows manual entry of data not found in Commons or xTrain. Manually entered information is stored in xTRACT and can be re-used when preparing subsequent training table submissions.

If you are a Signing Official (SO), Administrative Official (AO), Business Official (BO), Principal Investigator (PI), or assistant (ASST) in Commons, you have access to the xTRACT module.

This online help does not contain field by field help; for field level help, see the Training Data Tables Instructions here:

Research Support

This section, under Participating Faculty, details the sources of support for the participating faculty member who is currently being edited.

NIH and Other Agency Sources of Support on Record

Use this section to report currently-funded, active NIH or other Agency grants on which this faculty member is working. This list might be automatically populated with records if the faculty member is on record as being funded from NIH and other grants.gov systems. Records that are automatically populated lack an Edit or Remove button and thus are read-only.

Use the Add Project Lead button to search for other NIH or Agency grants that contain sources of support. If the faculty member is reported on an RPPR, then those grants will be displayed as suggested sources of funding, but you can also find and choose grants outside of that suggested list. Grants not currently funded cannot be added.

      3. The tab-delimited template format includes the following required columns: Commons User ID, Trainee Type, In-Training Indicator, Start Date, End Date, Research Topic, Faculty Commons User ID 1, Faculty Commons User ID 2.
4. The Commons User ID, Trainee Type, and In-Training Indicator are required for each uploaded participating trainee. The other columns may be left blank, as appropriate.

5. If the same Commons ID is provided for multiple entries in the upload file, an error will be reported.

6. The trainee Type must be one of the following (without quotations): "POST-DOC", for Post-Doc, "PRE-DOC" for Pre-Doc, and "SHORT-TERM" for Short-Term.

7. The In-Training Indicator must be one of the following (without quotes): "Y" for Yes or "N" for No.

8. Valid date format for Start and End Dates is MM/YYYY.

If uploading date to update an existing participating trainee, all information on the input record will be used to replace data that is currently stored, with the exception of the trainee type which cannot be altered. For faculty member, this means that any faculty who may currently appear for the indicated trainee in xTRACT will be removed, and then replaced by the faculty who are listed for that trainee in the upload file.

13. The data will be validated upon upload of the file and the results will be presented on the screen.

14. If the upload fails for any reason (such as incorrect data or incorrect format), none of the records will be saved in xTRACT. Data will only be saved if all rows in the upload file pass validation.

c. A download link for a correctly formatted template is provided above the file field.

d. A **Browser** button allowing you to select an existing, correctly formatted file to upload is next to the file field.
3. When **Browse** is used to select an existing file, the system will perform a validation to ensure that the file conforms to the correct format and that the data satisfies the conditions described in the guidelines.
   - A pop-up message will display if the format is not valid and that file will not be uploaded. Any data validation errors must be corrected before any changes are accepted and applied.
   - If there are no validation errors, the data will be applied and a success message will appear.

Overview

This help section contains information to assist with understanding how the fields in each of the Training Tables are populated from the input entered into the various Research Training Dataset (RTD) screens in the xTRACT module of Commons.

**Table 1: Census of Participating Departments and Interdepartmental Programs**

This section explains what parts of the xTRACT module fill Table 1 of the training tables.

For detailed instructions on every field in the training tables, see [https://grants.nih.gov/grants/forms-f/data-tables.htm](https://grants.nih.gov/grants/forms-f/data-tables.htm).

The content of **Table 1** is populated with data pulled from the Participating Department/Programs Detail component of the RTD section. Depending on the type of application, this table may or may not be used, or only part of the table may be used. Refer to the Introduction to Data Tables document for specific information.

When working on an RTD, click on Participating Departments/Programs from the left menu.
The Participating Faculty screen will show the table of the current departments and programs. This table is the source of the names of the departments or programs in the first column of Table 1. If you need to add another department or program, select the Add Participating Departments or Programs button above the table.

Once the departments and programs are populated into the table, use the Edit button in order to add or change participant totals.
Click on **Edit** to open the *Participating Department/Program Detail* screen. The table on this screen is used to populate the rest of the columns in Table 1.
Due to instances where some faculty may serve in more than one department or program, the Total for the "Total Faculty" and the "Participating Faculty" columns may not be the sum of the individual department and program breakdown. This applies to both the Predoctorates and Postdoctorates tables. These figures are not calculated by the system, and must be entered in the Training Support & Summary section as outlined below.

Select Training Support & Summary from the left menu, expand the Census Totals section, and then select the Edit button for Faculty.
The Faculty Census Totals pop-up window will open. In this window, enter the number of unique individuals for the Total and Participating faculty. Click on Save to update the table.

These totals will update to the Total field for the first two columns (Total Faculty, Participating Faculty) for Part I and Part II of Table 1.
Table 2: Participating Faculty Members

This section explains what parts of the xTRACT module fill Table 2 of the training tables.

For detailed instructions on every field in the training tables, see https://grants.nih.gov/grants/forms-f/data-tables.htm.
The content in Table 2 is populated with data from the Participating Faculty selection under RTD. This selection will open up to Participating Faculty Members and will display a hitlist of members.

The Name column in Table 2 is populated with the names in the Person Name column of this hitlist of participating faculty members.

The remaining information for Table 2 is populated with data from the Participating Faculty Detail screen which is displayed when the Edit button (in the Action column) is clicked for a given person in the table.
The Degree(s) column of Table 2 pulls information from the Faculty Degree section. The degrees that are checked in the Include in RTD column will be included in Table 2.

The Rank, Primary Department or Program, Research Interest, and Training Role information of Table 2 is pulled from the Faculty Member Data section.
All of the Mentoring Record numbers are pulled from the Mentoring Record section.

Table 3: Federal Institutional Research Training Grant and Related Support Available to Participating Faculty Members

This section explains what parts of the xTRACT module fill Table 3 of the training tables.

For detailed instructions on every field in the training tables, see https://grants.nih.gov/grants/forms-f/data-tables.htm.
The information in Table 3 is extracted from information in the *Training Support & Summary* section found in the xTRACT module in Commons. Select *Training Support and Summary* from the left menu.

The corresponding screen will open. It contains the *Summary Statistics*, *Institutional Training Support Detail*, as well as the *Census* section. The first two sections are used for Table 3.
The information in the first four columns of Table 3 are populated with information from the **Institutional Training Support Detail** section.
The *Number of Positions Totals* in Table 3 are pulled from the *Summary Statistics* totals.

![Summary Statistics Table]

These totals are derived from the individual grant records listed in the *Institutional Training Support Detail*.

**NOTE**: If not all training support is listed on the *Training Support & Summary* screen, click on the *Add Institutional Training Support* button to add more. Refer to the related help information here; *Institutional Training Support*.

The information for each source of support can be edited or removed via the buttons in the *Action* column.

![Institutional Training Support Detail]

Clicking on the *Edit* button for a grant in that list will open up the detail screen for that grant.

In the *Detail* screen, select *Edit* in the *Number of Trainee Positions* section to make updates to the trainee position information including *Number of Participating Faculty*.
The number of trainee positions and overlapping faculty, for this grant, are then displayed in the **Number of Positions** and the **Number of Participating Faculty (Number Overlapping)** columns in Table 3 for that grant.
The last column of Table 3 is populated with the information in the *Overlapping Faculty* section of the individual grant's *Institutional Training Support Detail*. Only the last name of any overlapping faculty is listed. If any listed faculty should *not* be categorized as "overlapping", use the **Remove** button to take them off of this list.

If there are additional faculty who are participating and are also on the Institutional Training Grant, select the **Add Overlapping Faculty** button from this section to add those individuals.

The last names of the overlapping faculty will appear in the last column of Table 3 and the number of overlapping faculty will appear in parentheses after the total number of participating faculty in the preceding column.
Table 4. Research Support of Participating Faculty Members

This section explains what parts of the xTRACT module fill Table 4 of the training tables.

For detailed instructions on every field in the training tables, see https://grants.nih.gov/grants/forms-f/data-tables.htm.

Upon clicking Applicants and Entrants in the RTD menu, you may be prompted to enter the most recently completed academic year. Depending on the grant cycle, you can choose to report by academic or grant year, but always begin with the most recently completed year. Enter this and click Submit, at which time the links for Pre-Doc Applicants and Entrants and Post-Doc Applicants and Entrants become enabled.
