

# Extramural Trainee Reporting and Career Tracking (xTRACT) Version 1.02 Release Notes

## New Features

### *Training Grant Search Progress Indicator*

A progress indicator has been added to the *Search Training Grants* screen to let users know that the search request is in process. The indicator – along with the word *Searching...* – is located below the search parameters.

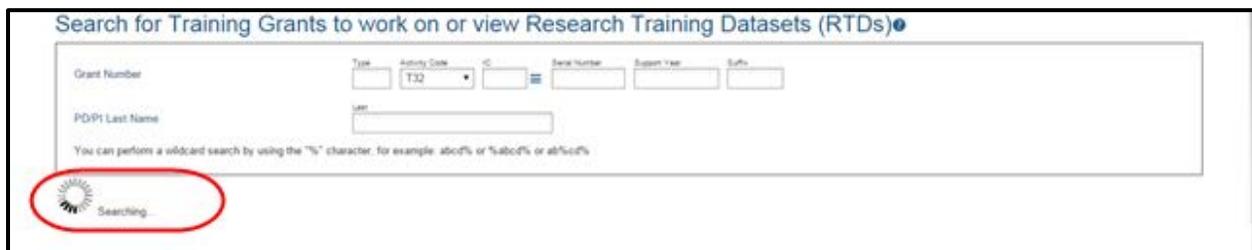

Figure 1: Search Progress Indicator

### *Prepare for Renewal Link Added to Actions List*

The **Prepare for Renewal** link has been added to the *Search Training Grants* results **Action** list for any un-awarded type 5 grant when that type 5 represents the final year in the current project period.

Figure 2: Prepare for Renewal Action Link

The **Prepare for RPPR** link for these applications remains an option as well.

## Fixes

### ***Corrected Display of Statuses in Search Results***

Prior to this release, although available **Action** options displayed correctly for a grant, the **Status** column of the *Search Training Grants* results included Research Training Dataset (RTD) types that might not apply to a particular grant (e.g., *Not Started (Revision)*).

This has been corrected. The **Status** column no longer displays incorrect status types.
